

## **STAR WARS RESEARCH:**

*Some Thoughts about Military-Industrialism*

**Ted:** Most people understand as much about advanced military research as they do about particle physics.

**Terri:** (excitedly) Yeah! What sort of future are we cooking up? That thought makes me anxious . . .

**Tim:** Be fearless. Diplomacy and militarism both have their place. Isn't that why the ancients said that Mars needs to be married with Venus?

**Ted:** (frowning) Hmm. Why does that sound like a vapid and worn out cliché?
