

TIME PORTALS:

Some thoughts about consciousness and transcendence

Lex : Humans are capable of experiencing timeless moments. Such moments are the treasure of a lifetime.

Ron : (laughing) That's an illusion: time flows with us or without us.

Lis : Does the brain manufacture reality or reality create our brains?

Linda : (sarcastically) Ahh! This conversation is too arcane!

Lex : (ignoring Linda) There is more interactivity than we imagine: the brain shapes our consciousness in part, but in some ways consciousness also influences the brain.

Lis : (feigning interest) Hmm. So what's that got to do with this art work?

Linda : (ignoring all others) Ah, blah, blah, blah . . .
