

THE SECRETS OF FLOWERS:

An efflorescent paeon

**Floral truths are manifestos
whispering secrets
we seldom perceive.**

**If you listen closely, however,
perhaps you'll hear these spontaneous decrees –**

**Come closer – embrace me!
Shake that pollen free!
No blossom lasts more than a season
so enjoy while you have energy**

**Floral truths are manifestos of joy
echoing in each breeze.
Bumblebees 'n butterflies get the message &
hummingbirds know flower-language instinctively.**

**Close yer eyes & inhale deeply –
Let Nature Speak**

Gwen: Kun our small brains ever really comprehend the secret ah anything?

Tara: Not with words . . .
