

## VERDIGRIS:

A celebration of green

The radiance  
of dark malachite crystals  
& glitter of shiny chromium sheets

The patina  
of corroded bronze sculptures  
& chlorophyll-intoxicated leaves

The luster  
ah spotted frogs on lilies  
& lights of vehicles that speed

The tint  
of pointed pine needles  
& emerald hues of foggy heaths

The beauty  
of dense rainforests  
& shimmer of arboreal centipedes

Our world has so many reasons  
to celebrate green!

**Noel:** Why rave about green?

**Tara:** I dunno, but can't you sometimes sense the fantastic green energy ah life?

**Orapan:** (frowning) Money i\$ dah only "green energy" mo\$t people urr intere\$t\$ted in.

**Tara:** Nah. It's a poor substitute for dah feeling ah being alive.
