

MATRICES: SOME THOUGHTS ON SUPERFLUITY AND CORE VALUES

Warning!
Information overload.
Too much streaming data
For mere human brains.
New information processors needed:
buffers must be purged.

System overload seems immanent.
And must be restored.

While the opportunity exists
let me log out –

In my next incarnation
let me be a

- Gus :** Ah, so much text – so little meaning!
- Bill :** That is what happens when there are too many words.
- Liao :** A wise man once said we only need to understand one word: God. All other words are superfluous.
- Nadya :** (laughing) Get real! Humans can no better understand God than an ant could understand astro-physics.
- Liao :** (sighing) You are conflating awareness with information. They are quite different.

- T NEWFIELDS
